

FOR IMMEDIATE RELEASE

From

**THE LITTLE LISTENING POST at  
Washington, D. C.  
4811 Illinois Ave., N. W.**

The Little Listening Post at Washington, D. C. has just been given permission to release the following ANNOUNCEMENT of great importance to saucer researchers, saucer clubs and publishers of saucer bulletins the world over:

There has now been formed in Washington, D. C. THE NATIONAL INVESTIGATIONS COMMITTEE ON AERIAL PHENOMENA. A 24 page Prospectus shows the wide scope of the organization, which will act as an Information Center and Clearing House for every phase of the subject related to the phenomena in our skies. It will also act as liaison between objective science and abstract interpretations in this field.

Officers are being chosen which are to include a Board of nine Governors of nationally known names. The Charter calls for ten Sections: Administrative; Investigations; Technical Interpretations; Abstract Interpretations; Library and Statistics; Publications; Public Relations; Government Relations; Religious and Philosophical Considerations; International Coordination.

And for ten Subcommittees: Policy and Steering; Membership; Government and Military liaison; Industrial and Commercial liaison; Church liaison; Physical Sciences; Abstract Sciences; Library; Publications; Finance and Awards.

Spacious offices have been secured at 1536 Connecticut Avenue, in Washington's better business district - as befits a purpose of such high import! Prominent and highly respected business men now connected with this movement predict overflow activity in a matter of weeks. Also, that this will evolve into a world organization, within a year or two - with offices in Geneva.

Money for this great new project is already flowing in. To Mrs. Julia McGarvey of Bethesda, Maryland goes the honor of having made the first gift -- a check of \$100. subscribed August 24th, 1956.

The NATIONAL INVESTIGATIONS COMMITTEE plans to publish two magazines -- One, "a monthly scientific journal containing not only a record of meetings and matters of interest to the membership but also statistics and summaries of important investigations conducted by the Committee. This publication may contain authoritative technical articles on the subject of space flight and the progress being made in the United States and in various countries of the world."...The other magazine, "Space Flight", will be a popular monthly of high quality, semi-technical, with photographs in color and selected science fictions. This magazine will probably be published under franchise and could provide a substantial source of income.

This announcement is bringing a surging that is palpable! People are alerting libraries, showing the Prospectus to bookstores, discussing it with their bankers and telling their friends. It is as though the floodgates had been opened and long-confused and pent-up forces had at last found a safe and orderly outlet through which to flow toward some great new horizon!

If you want to help, or if you want more information - write to THE NATIONAL INVESTIGATIONS COMMITTEE ON AERIAL PHENOMENA, 1536 Connecticut Avenue, Washington, D.C.--or to ----
